

International Society for Weigh-in-Motion

Our Society

The International Society for Weigh-in-Motion (ISWIM) brings together users, researchers, and vendors of systems for weighing in motion of vehicles. This includes systems installed in or under the road pavement, bridges, rail tracks and on-board vehicles. Membership of ISWIM is free of charge for individual members.

Our Goals

The aims of ISWIM are to support:

- the advances in weigh-in-motion technologies; and
- the more widespread application of WIM systems and data.

Our Activities

This we do through:

- The organisation of international conferences, regional seminars, and workshops on WIM technology and applications.
- The support of international research and development projects on WIM.
- The support of developing standards relating to WIM and its applications.
- The publication of papers and articles in international magazines.
- The promotion of the application and use of WIM systems and data at exhibitions and trade fairs.
- The use of discussion forums for all aspects of WIM.

Your Benefits

If you are a user:

- White paper on the benefits of WIM*.
- Basic user training (WIM-101) in different languages*.
- Simple cost-benefit calculation*.
- Standard data format*.
- Full access to a library of papers on the application of WIM.
- Overview of the main vendors of WIM systems.

If you are a researcher:

- Strategic research agenda* (includes description of the areas of interest for future developments).
- Overview of ongoing research*.
- Interactive library on our website with papers and reports.

If you are a vendor:

- Market overview of installations per Region/Country including vendor, application and type of customer and benefits*.
- Example implementation of WIM for Direct Enforcement (step-by-step guide)*.
- International standards with system requirements and test procedures.
- Example of WIM tender*.

*ISWIM products still under development and may not be available
